## FEATURES

## PROPERTIES

CERAMIC PLUS is a thick, protective coating that allows for a recovery of up to 40% of light scratches and marring due its self-healing capabilities. While some deeper scratches may not completely recover, they will be much less noticeable and almost undetectable on lighter colored paints. Over the life of the installed product, a vehicle coated with CERAMIC PLUS will show significantly less swirls and marring than many other professional ceramic coatings on the market due to the recovery properties of the coating.
