# Introducing SKID PLATES

**An Engineered Bumper Saving Solution.**

by

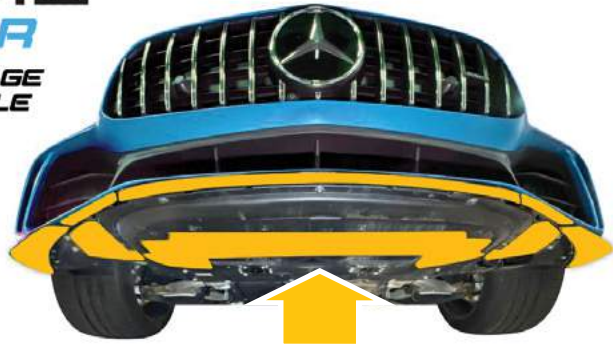

• Engineered Protection • Prevent Bumper Scraping • Alleviates Curb Stress • No Permanent Modifications

**Prevents the "Road Rash" grinding sound when going over curbs!**

**AMG  
GT-R  
COVERAGE  
EXAMPLE**

**FACTORY UNDERTRAY**

**SKID PLATE ADDITIONS**

## The Product:

► Automods Skid Plates are 3D Laser Scanned, CAD designed, and CNC machined in the USA. This allows us to provide a perfect fit and finish on every product we offer. Once installed, the skid plates will prevent damage to the bottom of the front bumper and protect the leading painted edge.

## Material:

► Our Skid Plates are made of a marine-grade ABS polymer that is stabilized to resist saltwater, chemicals, and UV damage to ensure many years of perfect performance. The edge of the skid plates are beveled and the holes are counter-sunk for added durability.

## Features:

- Light weight 1/8" - 1/4" multi-piece designs.
- Ultra low friction high working surface.
- Provides protection where factory under-bumper aero/cover panels fall short.
- Uniquely engineered solutions for most modern luxury, exotic and performance vehicles
- Non-technical simple installations
- The front bumper remains on during installation.
- No holes need to be drilled. They use all possible OEM chassis mounting points.
- Stainless steel and/or aluminum hardware is provided.
- Depending on the car model, the Skid Plates are mechanically fastened with rivets. or in some cases is simply attached with durable 3M's strongest automotive double-sided tape.
- All Skid Plates come with a **Lifetime Warranty**.
- Designed and Manufactured in the USA.

**Skid Plate Packages are available for popular late model vehicles:**

**Ferrari**

**NSX**

**TESLA**

**BENTLEY**

**McLaren**

**PORSCHE**

**Zrauto**
